

This engaging, hands on Geographical Inquiry will help students answer the syllabus inquiry questions using Permaculture elements at Brewongle EEC:

- How do people use and alter biomes to produce food?
- What are some of the factors affecting food production?

During an excursion to Brewongle EEC students will use geographical skills and tools to complete the following:

- Mapping and GPS activity looking at permaculture elements and functions
- In depth soil health analysis comparing natural soils to enhanced soils for food production

The excursion is scaffolded with pre and post visit lessons and a sample assessment task. We can cater to larger groups – so please contact us!
