*Connecting every learner to the natural world and inspiring change for a sustainable future.*

## Module 4: Human Impacts with Depth Study

**This is a rich and authentic first hand investigation. Students investigate the impact of the introduced Red Fox (*Vulpes vulpes*) on the forest ecosystem around Brewongle EEC. The investigation covers many of the Working Scientifically Skills and content from Module 4, Human Impacts.**

Scientific Inquiry Question

- How do introduced species affect the Australian environment and ecosystems?

Activities

**Abiotic Assessment** - Students conduct abiotic analyses as well as vegetation and habitat surveys.

**Nest Box Survey** - Students analyse fauna diversity and abundance using camera trap technology and nest box investigation techniques.

**Citizen Science** - Students add their data to online citizen science databases including the Atlas of Living Australia and Hollows as Homes.

*This program includes 2 hours of pre-excursion research tasks, 5 hours of fieldwork and data collection, 2 hours of post-excursion processing, analysing and communicating tasks, and an optional assessment task.*

### Syllabus Outcomes & Content

Outcomes:

- develops and evaluates questions and hypotheses for scientific investigation EES11/12-1
- designs and evaluates investigations in order to obtain primary and secondary data and information EES11/12-2
- conducts investigations to collect valid and reliable primary and secondary data and information EES11/12-3
- describes human impact on the Earth in relation to hydrological processes, geological processes and

biological changes EES11-11

Content:

- Effects of Introduced Species

Cross Curriculum Priorities

- Sustainability
